Python clock model: CA from 1 MSS, 1 GiB, RTT 100 ms, no loss
3 identical repeats per gain; middle: groups 300-600; late: 900-1200
Full sweep
Critical neighbourhood
Actual group span L (ms)
Fixed pacing gain g
C = 1.5 ln(3)
middle groups: median and range
late groups: median and range
